

January 20-22, 2016 - Mandalay Bay Convention Centre, Las Vegas, NV.

Booth 2509

Come and see us at Surfaces!

For the third consecutive year, InstaFloor North America will be exhibiting its revolutionary flooring installation system, InstaLay, at 'Surfaces', the major US flooring show in Las Vegas. Our previous appearances have been very successful, providing the perfect opportunity for the InstaFloor team to meet new and existing customers, allowing them to see and feel InstaLay and witness its many benefits.

InstaFloor will be demonstrating the installation of porcelain, ceramic and natural stone tiles using InstaLay 25hg (2.5mm high grab), which was also

designed for use with LVTs. This, together with InstaLay 30 and 50 for carpet tiles and wood flooring, will be the subject of frequent demonstrations throughout the show.

We look forward to welcoming you to our booth and if you'd like to arrange a meeting with us during Surfaces, please contact [Bas van Genderen](#) prior to the show.

Alternatively, just drop by to see our frequent InstaLay demonstrations – we're sure you'll be impressed!

With no messy wet adhesives or open time delays, flooring installations using InstaLay are quick, clean and easy and save significant time and money. Made from recycled rubber crumb, eco-friendly InstaLay is loose laid, greatly reduces sub-floor preparation times, and provides superior comfort and long lasting acoustic performance when used with LVTs, carpet tiles, solid and

engineered wood, laminates,
porcelain and ceramic tiles and
carpets.
