

Offices in the UAE use InstaLay to install new carpet tiles

As the popularity of InstaLay continues to spread, it has now been used when installing new carpet tiles in the Dubai offices of German company Ansorg GmbH, specialists in lighting systems for the retail sector.

The offices, in the new Sheikha Sana Mana Al Maktoum business complex, are close to

Burj Khalifa, the world's tallest building at 829.8m high. Ansorg liked a number of the features and benefits provided by InstaLay and felt it was well suited for use on the tiled sub-floor.

- Virtually no sub-floor preparation was required and the InstaLay 30lg was simply loose laid to the tiles. This ensured the tiles were not damaged in any way and the carpet tiles could easily be removed / replaced at a later date.
- The installation was completed quickly and easily, very important for a busy working office, and without any messy or smelly adhesives being used.
- Manufactured from non-collapsing, recycled rubber crumb, InstaLay's anti-fatigue characteristics and high acoustic performance provide a quieter and more comfortable working environment for Ansorg's staff.

Following this successful installation we hope other projects will soon follow throughout the region.
