

InstaLay - the new self-adhesive acoustic underlay

InstaLay is a high quality rubber crumb recycled **acoustic underlay** that exceeds the sound regulations for soft floor coverings. **InstaLay 30lg/hg** (3mm) achieves **23dB ΔL_w** and **InstaLay 50lg/hg** (5mm) achieves **26dB ΔL_w** acoustic improvement.

Specifying InstaLay means that you are helping to recycle 66 truck tyres or 400 car tyres for every 1000m² of underlay.

InstaLay creates a comfortable anti-fatigue flooring solution, reducing health issues for employees associated with hard floor coverings.

InstaLay is also very versatile and provides the highest quality acoustic underlay for carpet, solid wood, engineered wood, laminate, sheet flooring, carpet tiles and luxury vinyl tiles.

Some of the key benefits of InstaLay are:

- Improves acoustic performance and exceeds Document E regulations for soft floor coverings.
- Made from recycled truck tyres and fully recyclable (true cradle to cradle product).
- Delivers BREAM/Code for Sustainable Homes credits.
- Suitable for under floor heating applications.
- Anti-fatigue underlay for hard floor coverings.
- Speeds up installation times by reducing the need for messy adhesives.

Download technical details and fitting instructions on our website where you can also view the InstaLay fitting demonstration videos for wood, vinyl tiles and carpet floor coverings.

If you have any technical questions or you would like an NBS project specification, feel free to get in touch. Reply to this email or call us on **+44 (0)118 973 9560** and ask for Shaun Smith.
