

## Come and see us at Domotex!

11th-14th JANUARY 2014  
STAND No. H16 - Hall 06.

Having just returned from a very successful NAFCD show (North American Association of Floor Covering Distributors) in Chicago with InstaFloor North America, we are now gearing up for Domotex.

We hope you will be able to visit our stand where we will be showing our range of high performance flooring solutions, InstaLay, InstaCradle, InstaSport and InstaStop.

If you would like a complimentary ticket(s) please contact Paul Robson at [paul.robson@instafloor.co.uk](mailto:paul.robson@instafloor.co.uk)

- **InstaLay** is an innovative, environmentally friendly, acoustic underlay system that is extremely quick and easy to install. Normally loose laid, it incorporates an adhesive membrane that eliminates messy wet adhesives and delays to significantly reduce installation times and costs. Durable, stable and providing exceptional underfoot comfort, InstaLay is suitable for Solid & Engineered Wood, Laminates, Bamboo, LVTs, Vinyl, Carpet Tiles and Carpets.

InstaLay Self-Adhesive Acoustic Underlay

InstaCradle (Acoustic Cradle)

InstaSport Completed Project

InstaStop (Wood Grain)

InstaStop (Funky Colour Range)

- **InstaCradle** and **InstaSport** acoustic/sprung undercarriage floors use a unique rubber

crumb cradle that is guaranteed for 60 years. These adjustable raised floor systems, with a service void, include on-site levelling and remove the need for wet screeds. InstaCradle is also suitable for use with outside decking.

- **InstaStop** is an exciting new range of upmarket non-slip door stops that are both practical and stylish. Available in a striking range of wood effect finishes and funky colours, eye-catching InstaStops are an attractive addition to any home or business.
- Sustainable InstaFloor products are predominantly manufactured using recycled rubber crumb granules from worn vehicle tyres, illustrating our commitment to providing environmentally friendly flooring solutions. InstaLay and InstaCradle are genuine 'cradle to cradle' products that can be recycled repeatedly, without losing integrity or quality or being 'down-cycled' to ultimately become waste.

If you would like to arrange a meeting with us during the exhibition, please contact **Paul Robson**, or just drop by for a coffee or a drink and see our InstaLay demonstrations – we're sure you'll be impressed! We look forward to welcoming you to our stand at Domotex.
