

New InstaLay 25hg is ideal for use with Luxury Vinyl Tiles

The latest addition to the unique range of **InstaLay self-adhesive acoustic underlays** is IL25hg, a new 2.5mm thick version designed specifically for the installation of 2.0mm or 2.5mm luxury vinyl tiles (LVT's) and woven

vinyl tiles.

This new InstaLay is still manufactured using recycled rubber crumb. However it is firmer, so provides far greater support for LVT's, which reduces potential point load indentations from thinner LVT's, while still producing an excellent finished floor.

InstaLay 25hg has good acoustic characteristics (InstaLay 30 is recommended if higher acoustic performance is a priority or if the LVT being fitted is 3.0mm or thicker). InstaLay 25hg is an environmentally friendly product with true cradle-to-cradle recycling potential and also offers all the benefits associated with the InstaLay range:

- ✓ It is loose laid directly to the sub-floor and forgives minor surface irregularities.
- ✓ Installation, with no messy wet adhesives, is significantly quicker and more economical.
- ✓ Manufactured from recycled rubber crumb, it gives non-collapsing support for the life of the floor.
- ✓ It ensures a more comfortable, warmer floor with its anti-fatigue characteristics.

Adore 2.0mm Dryback LVT being installed on IL25hg

Both InstaLay and LVT's are becoming increasingly popular worldwide and, with the introduction of IL25hg into the InstaLay range, the installation of thinner LVT's on InstaLay has been more adequately catered for. It is supplied in 15m² / 161.46ft² rolls which weigh 17kg / 37.5lbs, making them lighter and easier to work with.

Full product details, including complete specifications, applications and fitting tips and considerations are available in our new InstaLay LVT brochure – [click here for a PDF download](#).

Stock is available from the factory in South Africa and also via our [distribution centres](#) in the UK and the USA.
