

INNOV8 FLOORS

V-STONE

Natural Slate & Stone

V-Stone is real veneered stone flooring, which is warm to the feet, similar to solid stone in appearance and touch as well as its quality. However the floor does not share the negative characteristics of a natural stone (initial cost and cold to the touch). The different qualities of this natural stone (slate or mica slate) and its natural colours make every panel unique.

It can be installed using the Click System on Instalay 30LG / Dry Back on Instalay 25HG or alternatively can be supplied with our **MAGNAFLOOR** magnetic backing to be installed direct to metal raised access flooring or floating on Ezy-Install magnetic flooring underlay.

Advantages of Slate & Stone

NATURAL PRODUCT

INNOV8FLOORS V-Stone consists of a thin veneer of authentic slate and stone, which through a unique process is sliced and abraded to millimetre thin layers.

STRENGTH OF STONE COMBINED WITH CORK

Slate and Stone is combined with a cork underlay which provides the advantages of both natural materials to create a unique versatile product. The natural disadvantages of real stone (cold and hard) are now compensated with the advantages of cork, such as thermal insulation and sound insulation. The stone surface remains stable, is easy to maintain and creates a special surface.

UNIQUE SURFACE

The slate / stone surface with its natural colour variation ensures each floor has a unique structure.

THERMAL INSULATION

Particularly suitable for areas that require a reduction in sound and increased thermal properties, due to the high thermal insulation properties and sound reduction of 17dB.

Domestic Class 23

Commercial Class 31

Underfloor Heating

Easy Maintenance

Sound Impact

Use of Natural Raw Materials

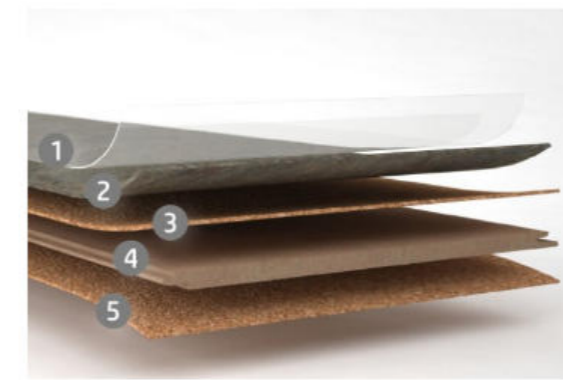

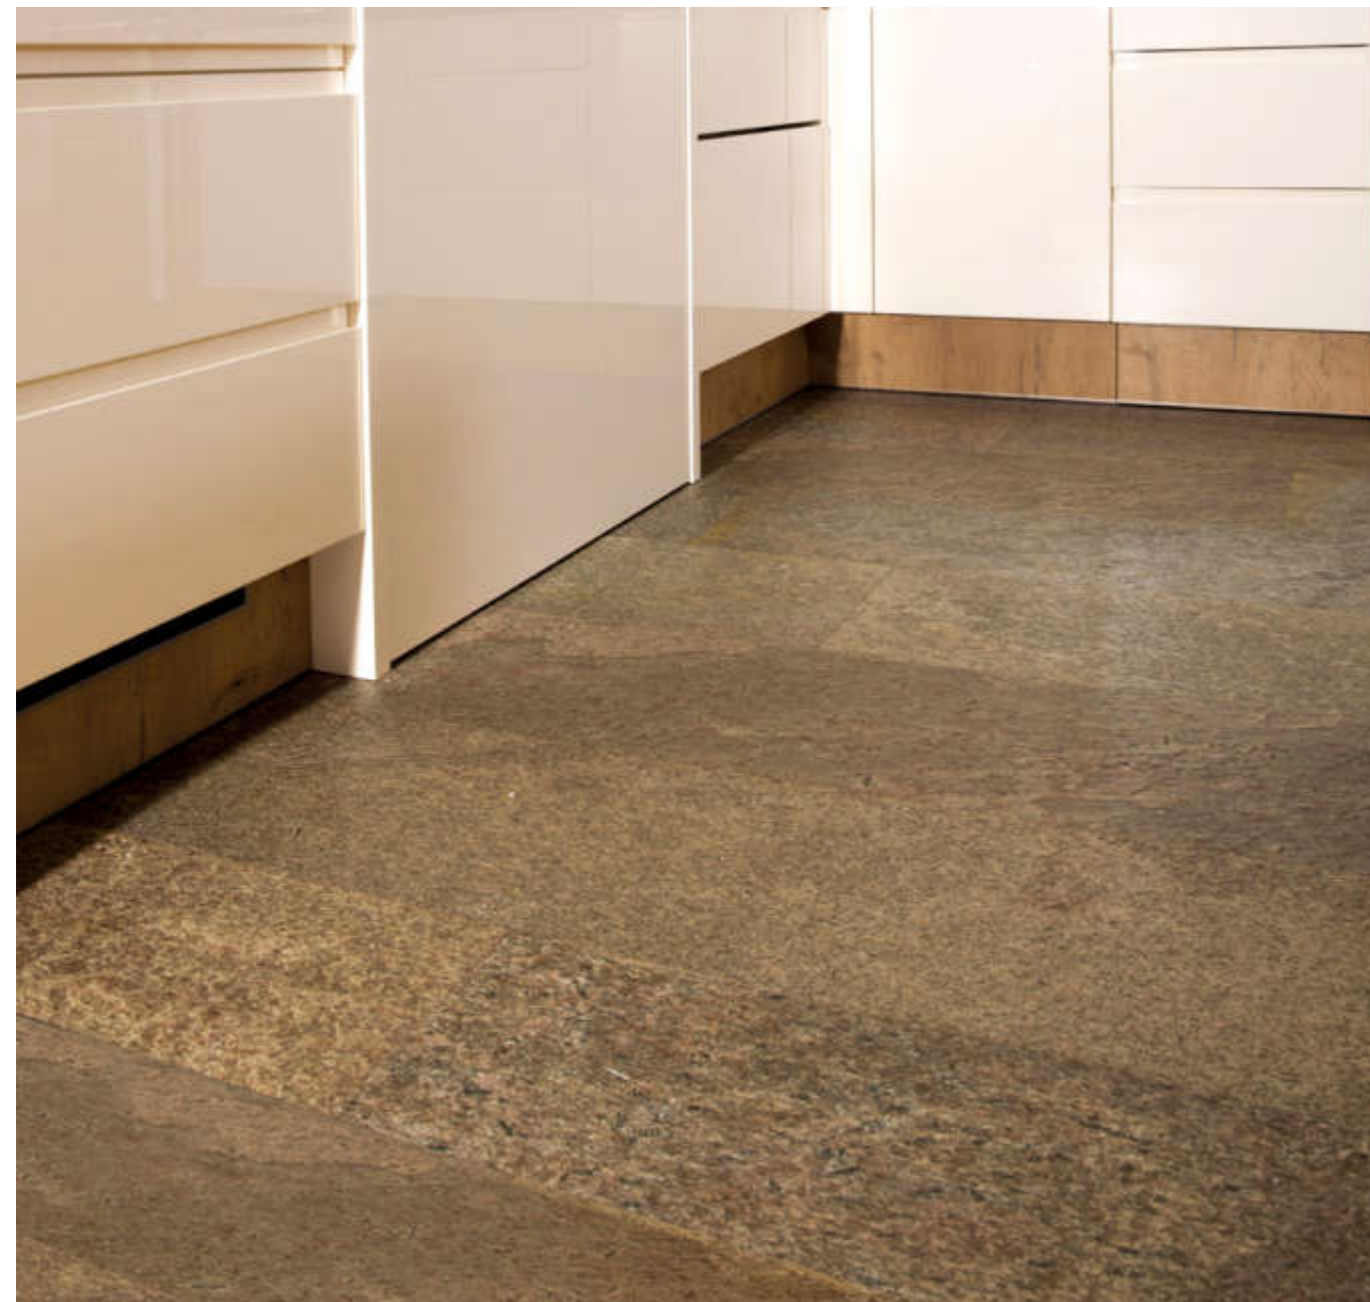

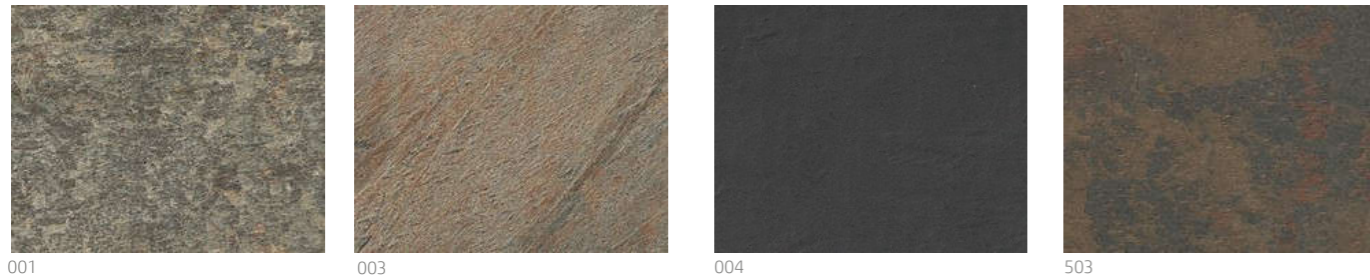

Dimensional Stability

Warm to the touch

Soft to walk on

HDF - Click System | 11mm

- 1 Natural Oil Surface Finish
